Telephone Conversation regarding Single Waste Management Unit #12
located at the Armco Inc., Kansas City Works of the
HSWA Permit Number: MOD 007118029

Per our telephone conversation on June 23, 1994, Amoco has agreed to sample the two existing wells located near the Single Waste Management Unit #12 at the Armco Inc., Kansas City Works Facility. We will sample both wells for Skinner List constituents and any metals that are not on the Skinner List but are on Appendix VIII and are unique to the steel manufacturing process.

This sampling will be conducted as soon as a sampling contractor in the local area has been contracted to sample both wells. A sampling report of the field effort will be issued to you after the sample results have been evaluated.

In the meantime should there be any issues regarding this SWMU please feel free to call me at 312-856-5042.

Sincerely,

Raymond D. Stoelting
Remediation Coordinator
